

The role of controller within GDPR

.I Definition

The controller is actually **in charge of processing definition framework**: (s) he “*determines the purposes and means of the processing of personal data*” so (s) he is the contact person and the contracting party with the data subject.

The controller can be “*the natural or legal person, public authority, agency or other body [...]* alone or jointly with others”.

Where Union or Member state law determines the processing, the controller must be eligible according to *the specific criteria for its nomination [...] provided for by Union or Member State law;*”¹

.II Responsibility of the controller

- Implement appropriate technical and organisational measures.
 - ➔ Pseudonymisation: user as ID and not with real contact details
 - ➔ Data minimisation: only data required for processing
- Implement appropriate data protection policies.
- Adhere to approved code of conducts or approved certification mechanisms

CSQ 1? Burden of proof: the controller must demonstrate that the processing is performed in accordance and compliance with this Regulation

Examples:

- *Review terms and condition for user; put it online using a pop-up: when the user connects, allow connection only if user read the text.*
- *Contact users/customers with e-mail about new data policy*
- *Inform users/customers with article in newsletter or mailshot when they have subscribed: the next time they connects , they must review terms and conditions before going ahead using application (web site, mobile applications or e-services)*

CSQ 2? Joint controllers: when two or more controllers determine jointly the purposes and means of processing, they have to define their arrangements or gentleman agreements
